

## Stick with Style

### Redi-Tag Flags Pair Function and Flair

Redi-Tag Corporation recently announced the newest addition to its line of film page flags: the Pop-Up Flag Dispenser. Redi-Tag offers the same high-quality page flags as its original page flags, in an affordable, yet stylish dispenser. Redi-Tag self-stick page flags are made from durable film that will remove and reposition easily without damaging the document. The clear portion of the flag sticks where needed without covering up text. The color portion is non-adhesive to extend out and be seen easily, even in a large stack of paperwork. Write a note or direction on the flag with ballpoint pen, pencil, or permanent marker.

One-inch flags are available in five colors and pre-printed "Sign Here." For more information, visit [www.reditag.com](http://www.reditag.com).

## Shipping Savior

### Neopost Takes Pain Out of Mailing

Through an agreement with United Parcel Service (UPS) and the United States Postal Service (USPS), Neopost Online Shipping boasts an innovative, Web-based shipping application that allows users to easily compare shipping options. By taking advantage of this advanced shipping tool, customers can access the best delivery options available, reduce shipping costs, and increase efficiency.

Ideal for businesses that ship two or more packages per day, Neopost Online Shipping provides a convenient way to manage multicarrier shipments. Users will benefit from the easy-to-use "Find Best Service" panel, while the built-in CASS-certified address verification software minimizes the added cost of returned packages.

## Shop Around

### PS|Ship Tracks Delivery Rates, Time

PS|Ship™ announced new features and functionality for the PS|Ship™ suite of software products. *PS|Shop™*, a new price shopping module, allows users to quickly and easily shop for the lowest shipping rates and fastest delivery times available.

"We are constantly striving to add more features to PS|Ship's products to make the end-users' experience even better," said Peter Marks, Founder and CEO of PS|Ship. "These new upgrades will make the software even easier to use and help law firms recover 85 percent or more of all shipping charges, which even in this day and age can still be a big part of a firm's expenses."

PS|Ship™'s Invoice Server allows the firm's accounting staff to reconcile all shipping bills in one location, increasing cost recovery while reducing turn-around time on cost allocation and preparing client billings. A reporting function quickly generates complete reports required to justify all shipping related expenditures.
