PS|SHIP ANNOUNCES FULLY INTEGRATED LABEL GENERATION AND INVOICING SUPPORT FOR WASHINGTON EXPRESS

This tightly integrated offering marks the beginning of partnerships with local and regional carriers across the nation

Albany, CA — June 4, 2008 — PS|Ship™, a division of Lynch Marks and the leading provider of shipping automation tools for professional services firms including more than 65 of the Am Law 200 firms, today announced a partnership with Washington Express, one of Washington D.C.'s largest and most respected courier services, to bring support for same day shipments and invoice processing to businesses in the Washington D.C., Maryland and Virginia region.

"This relationship further solidifies our commitment to bring the best in shipping services and automation to the entire country," stated Peter Marks, founder and CEO of PS|Ship. "We are excited to partner with the leading carrier in the D.C. area, and are continually looking to bring other regional carriers into our support network."

This relationship provides PS|Ship clients the ability to seamlessly create shipping labels and process invoices from Washington Express in the same manner they have for the major national and international carriers.

"PS|Ship software is a state-of-the-art technology tool for managing and controlling shipping services and expenses and we are proud to partner with them in working with our law firm clientele in the Washington metro area," stated Gil Carpel, CEO of Washington Express.

Washington Express is the leading same-day delivery company in the Washington D.C. metro area and thousands of companies rely on them for on-time and cost-effective delivery everyday.

PS|Ship's products automate and simplify the entire shipping cycle by linking contact management data, shipping vendor services and billing systems through a single, unified, Web-based interface.

About PS|Ship

PS|Ship is a product of Lynch Marks, L.L.C., a leader in providing technology solutions and consulting to the professional services industry. The PS|Ship suite of modules (Label Server and EDI/Invoice Server) streamline the entire shipping process by integrating internal data/systems with the global providers – including FedEx, UPS, DHL and USPS – and local couriers from the point a label is created at the desktop to automated accounting and cost recovery.
